iseek CASE STUDY

C&K Association

The Crèche & Kindergarten Association Limited (C&K) is regarded as one of Australia's leading providers of childcare and kindergarten services. C&K have close to 400 services and are proud to have educated more than one million Queensland children.

Understand the situation

Due to an existing provider migrating their services to a new data centre, C&K was faced with the choice to either remain with the current provider or transition onto iseek's Enterprise Cloud platform.

After a tough selection process, C&K chose to migrate to iseek's Enterprise Cloud.

This decision was based on the following reasons:

- Reduction in costs.
- Ability to deliver tailored solutions.
- Confidence in iseek's services.
- Compliance in government regulations.
- Locally delivered and supported services, 24/7/365.
- Data sovereignty.
- Brisbane based ISO27001 certified data centres.
- Professional migration strategy.
- Ability to work as an agile team.
- Minimal customer migration downtime.

Find a solution

The project involved accumulating several aspects of cloud, DRaaS (Disaster Recovery as a Service), networking and data centre services. This enabled a tailored, private cloud environment for C&K on iseek's Enterprise Cloud platform. Connectivity to this private cloud environment was achieved via iseek's supplied and managed services.

The migration from their current service provider to iseek's Enterprise Cloud environment was a collaborative effort between both C&K and iseek's technical teams. iseek's Cloud team lead the project management, design, build and migration, while C&K's team ensured technical signoff for their business applications.

The solution resulted in a private cloud environment for C&K, leveraging a mixture of iseek's Cloud IaaS (Infrastructure as a Service), storage, backup and networking services — all delivered from iseek's Eagle Farm data centre.

Provide results

The migration activity was both efficient and smooth with all components successfully migrated within the relocation window. The solution resulted in C&K recognising the benefits of iseek's private Enterprise Cloud, as well as enabling the ability to leverage iseek's wider services.

The final outcome delivered C&K with a fully managed Enterprise Cloud, designed and maintained by iseek's engineering teams.

The overall solution is supported by iseek's Cloud Portal. The solution provides a fully featured customer interface providing visibility and management of iseek's Enterprise Cloud, Data Centres and Networking Services.

C&K Childcare & Kindergarten
Early Learning since 1907

> **iseek are great to work with and we do appreciate the support we have received from the whole iseek team in relation to this move.**
